

Sixty five years we carefully plan, build and shape the world around us,
and bring people closer together.
It is our pledge for the future 65 years of success!

By celebrating 65 years of Energoprojekt Group's sound and successful business practice, we highlight that our staff, to which we are particularly proud of, is our most precious and valuable asset.

While respecting the human health, and thus the company's staff, we promote a healthy living in terms of the well-being of our employees, their families and the society, as to achieve even better results in the years to come. Let the every step of our employees be a joint step towards a better future.

On the occasion of Energoprojekt Group's 65th anniversary celebration, Energoprojekt Entel bestows a special gift to its employees – a Garmin's Vivofit2 fitness bend.

The Vivofit is the activity tracker that shows the number of steps, calories, distance and time of day on a backlit display. It is water-resistant to a depth of 50 m and compatible with ANT + TM heart rate monitors for fitness training.

Fitness tracker follows the progress of its user 24/7, and automatically greets the user with a personalized daily goal. It can also be automatically and wirelessly syncs via Garmin Connect TM Mobile application smart phone or PC, with free online fitness community Garmin Connect TM, with currently over four billion kilometers uploaded by the users, giving the user the ability to see a complete picture of its progress, but also to compete with other Vivofit users or start its own competition with friends for virtual badges and bragging rights.
